FOOT HEALTH ACCESSORIES

Plantar Fasciitis

The most common cause of heel pain

Plantar Fasciitis involves pain and inflammation of the thick band of tissues known as the Plantar Fascia. It is commonly experienced as a stabbing pain first thing in the morning. Every year, 2 million people are treated. Offer your customers a range of cash products to help relieve heel pain. Take for example, the FD100 Orthotic. Simply selling 2 pair a week produces over \$3,500/year of extra income.

STEP TWO: Bond with Renia COLLE DE COLOGNE®

The open time for Renia COLLE DE COLOGNE® is 5-30 minutes.

SIMPLE USAGE INSTRUCTIONS:

- As in all bonding: sand and clean dust from the surfaces.
 - Greasy surfaces (like PVC or TR) should be chemically cleaned with acetone or thinner.
- The softer the material, the less pressure. But with less pressure, press longer.
- Dry before bonding.
- COLLE DE COLOGNE® and MULTI-COLLE® can be used cold – or reactivated with infra-red, a heater or a hair dryer.
- Bonded parts can be sanded, trimmed and finished immediately after pressing.

Most products can be bonded without special preparation.

Some man-made materials may show good initial bonding but later separate under wear conditions.

To avoid this, we suggest the following special helpers:

With PUR – Use Renia Primer for PUR (green)
Pre-coat PU with green Primer and apply Renia Adhesives immediately

With TR – Use Renia RehaGol (yellow)
Pre-coat TR with RehaGol the yellow primer and wait 15 minutes before applying Renia Adhesives

Greasy Material – Use Renia Hardener
Mix 5% to 10% of Renia Hardener with the amount of Renia Adhesives you might need for the job and then work normally with this mixture. Any leftovers can be used for the next gluing job.
