

Support Services

Marketing

Power Products can support your business' marketing needs with high-definition product images, creative ideas, and other marketing materials.

Training

Take advantage of Power Products' expert training program for your sales team! All the information your team needs to be more effective in selling two-way radio batteries, chargers, and audio accessories.

Fulfillment

Power Products utilizes an efficient automated order management system to methodically process and ship every order promptly.

Custom Labels

With an adept staff and leading edge printing equipment, Power Products can supply custom labels for two-way radio batteries and select audio accessories. This process requires no minimum order quantity and allows printing up to 100,000.

Why Choose Power Products?

Power Products was established in 1994 and quickly became a leading supplier of aftermarket batteries, chargers, and audio accessories. Alongside delivering reliable, quality power solutions, our exceptional customer support team's responsiveness ensures we keep the world energized and running at all times.

Power Products offers a variety of battery types for any industry, including:

- » Intrinsically Safe
- » Smart & Semi-Smart
- » PolyMax
- » Primary Lithium
- » Clamshell
- » And more!

Compatible Radio Brands:

Motorola	L3Harris
BK Technologies	Icom
EFJohnson	Kenwood
Hytera	Tait
Harris	Vertex
And more!

Complete Guide to Power Products
Battery Offerings

Smart & Semi-Smart Batteries*

Next generation of two-way radio batteries designed to keep you protected, informed, and powered longer.

Designed with integrated microchips to enhance functionality and communication capabilities while ensuring compatibility with IMPRES™ 1 & 2 chargers and comparable equivalent to Motorola Smart batteries.

Benefits Include:

- » Sophisticated diagnostics & fuel gauge to manage battery power
- » Display features include battery recognition, rapid charging, & conditioning details
- » High capacity ratings for longer run-times

Power Products also offers Semi-Smart batteries as a cost effective alternative. Semi-Smart batteries only display the fuel gauge — no additional display features available.

**Note that Power Products' smart batteries still need to be reconditioned with an IMPRES™ charger every ~30 days to stay calibrated and display features.*

Primary Lithium Batteries

Intended for use in emergency communication situations where charging your two-way radio is not an option. Primary Lithium Batteries are single-use disposable batteries, also known as non-rechargeable batteries. Available for select Motorola, Kenwood, and Harris radio models.

Benefits Include:

- » Lightweight & durable
- » High capacity ratings for most models
- » 10-year shelf life with proper storage
- » Available in a unique colored housing for quick identification

Intrinsically Safe Batteries

Designed to safely power two-way radios in dangerous environments where combustible gases, particles, fiber, or dust exist. Intrinsically Safe batteries adhere to rigorous assembly standards to ensure reliability in the field while keeping your team safe.

Reliable power in industries including energy, mining, refineries, oil & gas, and many more.

Benefits Include:

- » Certified by SGS to TIA-4950/CSA C22.2 No. 157/UL 913 5th Edition standard for intrinsically safe and non-incendive use
- » Designed with shock absorbing materials and flex boards for added protection if dropped or subjected to impact
- » Enables safe operations in hazardous environments through built-in circuit protection

High Capacity (LiPo) Batteries

Powered by best-in-class **PolyMax HPC LiPo cells** with high capacity features that allow for longer run-times and improved self-discharge rates.

Benefits Include:

- » Increased cycle life in comparison to Li-Ion cells (500+ vs 300)
- » Improved self-discharge rate — less than 5% per month
- » Lighter weight in comparison to NiMH batteries of similar capacity
- » 2-year extended warranty for capacity (80%), materials, & workmanship
- » Compatible with Endura, Logic, and OEM chargers designed for Li-Ion batteries

Clamshell Radio Batteries

Designed to power two-way radios with AA Alkaline batteries for emergency responder radio coverage. Clamshell Radio Batteries allow for simple replacements with any off-the-shelf AA alkaline batteries when the cells can no longer power your radio.

Additional Batteries

- » Rechargeable Flashlight Batteries
- » FRS Radio Batteries
- » Pager Batteries
- » Scanner & Mobile Printer Batteries
- » Customer Battery Packs
